Comments:

I don't understand why you held town meetings about this low emission vehicle program when you weren't prepared to follow what the majority of Delaware residents were saying. Low emission vehicles are not the answer to oil problems or air pollution problems. There are many things still unknown about the life of the batteries and the vehicles themselves. I do not want the government making the decision about what type of vehicle I have to buy. It is not your place nor should it be in your power.
