Comments:

I do not believe it is right to mandate electric cars in 2027. This will not only have effect on those who cannot afford an electric car but it will also effect jobs in particular Home Health Care. Most caregivers will not be able to buy electric cars to travel from patient to patient. This should be a choice by the people not mandated for the people. I feel this is unconstitutional. The batteries that electric car use cost more to make and are the material mined to make the batteries are more harmful to the environment then gas. The cost to replace a battery in an electric car is not affordable to the blue collar work force.
