...I want to voice how horrible this mandate will be on hundreds upon hundreds of households in our state MOST people can not afford these vehicles or the charging stations to be installed...There has been no consideration for the senior citizen on a very fixed income (not to mention low income family's) ...it is hard enough to buy groceries let alone to worry about buying an electric car ..with this mandate the cost of a gas operated car will climb dramatically in price as the EV sales mandates reduce supply and increase demand. I am against having being told what I can and can't buy ...my husband did not fight in Vietnam to be told what he can and can't drive....I object to the fact that the people of our state did not have the chance to vote on this as it should be in a democracy....
