To who it may concern,

There are a lot of people in Delaware that can not afford electric cars. You have a lot of senior citizens who are on a fixed income. This would put a financial burden on them.

There are other ways to cut emissions. Even if you did pass this bill how wii you control vehicles that come into our state that are not electric from other states how will you regulate that? We should be able to choose what kind of vehicle we are able and can afford to purchase. Please don't put a hardship on citizens of Delaware that don't have the means to purchase electric cars. I have many other things to say about this but I think I have made my thoughts clear.

Thank you for your time.
