Comments:

I support the legislation. I think that the state must offer incentives both toward the purchase of an EV and the installation of home charging stations for this effort to be successful. Also, perhaps an incentive for trading in a gas powered vehicle could be an option as well. The Climate is headed for a catastrophe if nothing is done. The impact of climate change will spare no one regardless of borders on a map, political party, economic class or race. We can't run and we can't hide. Delay and denial will just make the outcome worse. Please prioritize the effort in such a way that all Delawareans will feel no hesitation in adopting these changes. Our dollar investment will show our commitment.
