Comments:

I strongly agree with DNREC's planned Low Emission Vehicle Program. I've had a hybrid vehicle that I gave to my Mom and also a Chevy Bolt and a Model 3 Tesla. These cars have been wonderful to own. Very low cost to maintain (none ant anll on my current 5 year old EV) and operate. Traveling in my current EV costs about 1/6 the price of gasoline. Compare that to my pick up truck which only gets 17 MPH and cost me over \$300 when it went in for service! Secondly, climate change is a real problem and Delaware's proposed Low Emission Vehicle program will help reduce this looming catastrophe. I want my children and grandchildren to prosper and survive and this is one step toward that goals. Thank you DNREC for making this proposal. Hopefully those opposed will come around and see all the benefits of this program!
