Comments:

Are you going to take away all freedom of choice? These climate religion people will destroy the entire company. I don't want an electric car. Electric cars are expensive. Their batteries cost as much as the car. We do not have an infrastructure that will support the cars! Just how much will the climate improve if we drive electric cars? Choice is the issue. If you want an expensive electric car, get one. Let me continue to drive my gasoline powered car. Stop telling people what choices they must make! All this green new deal stuff will not change the amount of CO2 in the atmosphere to any great degree. It is just a matter of power. I vote absolutely NO!
