Organization: No

Comments:

Please DO NOT enact any legislation banning gas powered vehicles in the State of Delaware! The Governor's push to move the State to low emission electric vehicles is ill-conceived and inappropriate at this time. Our economy is not ready for these vehicles and our infrastructure is in no way, shape or form ready for these vehicles! On top of that, Delaware is home to many, many retired people and we CANNOT afford this type of mandate, financially! Going GREEN is all well and good.....when we are properly prepared to do so. We ARE NOT properly prepared to move to all electric vehicles! Forcing low emissions vehicles on us, at this time or even within the next 15 years, is poor policy, bad for the economy, extremely bad for our electric grid and very, very bad for the citizens of this wonderful State! Politicians serve at the pleasure of their constituents. We have elections for a reason. Please DO NOT enact any legislation mandating low emission vehicles in the State of Delaware. Thank you.
