Comments:

I am opposed to DNREC's mandate regarding restricting the sale of gasoline vehicles starting in 2025. I do not believe that this is a necessary move in order for DE to meet Clean Air requirements. I do not believe that there will be adequate charging stations for so many electric cars. In case of evacuation, the demand and need for unavailable charging stations would be catastrophic I believe that the high cost of electric cars will be a burden to many families. I do not believe that an agency of officials who are not elected by the citizens of the state should make such an all-encompassing mandate..
