Organization: No, just a concerned citizen of Delaware!

Comments:

My concern is this: We don't have a viable solution to gas powered vehicles. Electric vehicles are not the answer. It will tax our power grid and I believe we all understand that batteries are NOT green. This is a "first world" problem. We are destroying the lively hoods of others by ruining their land mining for materials for batteries. Hybrid vehicles may make more sense, at this at this point. Perhaps by 2035 we will have a better answer, but it seems 2022-R-A-0011: Low Vehicle Program is putting "the cart before the horse".
