I strongly urge the halt of any mandate regarding the sale of only electric vehicles by 2035. Not only is this an overreach of power, but clearly all consequences of such a massive change have not been weighed. If there is an elected official who thinks that the average Delawarian can afford a \$60,000 vehicle it's time for them to step down immediately. If someone wants a hybrid or electric vehicle it should be available for purchase, but excluding gas powered vehicles for purchase it just plain foolish and short-sighted. Generating such a massive increase in electric needs impacts the environment negatively and is self defeating. Please do the proper research before impacting the daily lives of the people of Delaware.
