Comments:

1. How will the existing grid be able to handle the electric vehicle? What type of modifications will be required and what will be the impact to Delaware residents? 2. Since this is a mandate for Delaware residents what type of financial assistance will be provided? 3. What type of impact will lithium mining do to the environment? 4. When it's time for batteries replacement, how and where will the batteries be destroyed and what will be the impact to the environment? Since this is the United States of America how can you mandate this with out option?
