Organization: no

Comments:

Please do not pass this legislation. The title is misleading since our state already monitors emission by our state inspections. In the details our rights as residents are being dictated to us by the government. We like to use our gas cars they are way more convenient, economical and flexible than electric cars. Government officials need to talk to their constituents to understand what we are up against. Electric vehicles are expensive!, We would have to get the outlet put in for the car which is over 2k, the electric bill goes up, finding a charging station is not always easy and sometimes they are not accessible or working. Taxpayer \$ pays for all those charging stations, they are not free and driving interstate is limited. Electricity for all those electric cars also is provided by natural gas which defeats the purpose. This law should be docked til there is a better solution provided. We should never follow CA law....I have been there and they are doing a terrible job! Close to a million people have left their state because of over regulation and taxes. Please keep Delaware FREE!
