Comments:

I've read the proposed electric car mandate bill and wanted to let you know of my opposition. I believe that if people want electric cars they should be allowed to choose to purchase one. For those of us that have no desire to own an electric car we should also have that choice. By joining California and New York as well as the left leaning states, the Governor and legislature are taking away our ability to choose the type of automobile we wish to own. I'm a senior citizen and do not wish to spend my retirement money to buy an overpriced electric vehicle. You will drive people from the state like California and New York and wonder where all the people went. I hope that the state does not follow this silly move to electrification of our transportation infrastructure.
