Greetings,

My first thought is when did I elect DENREC to pass laws?

My 2nd thought is that it is against the Constitution to force me to buy a product!

For some reason Delaware wishes to be like California in every respect, well look at them, its not going good.

I am against Delaware forcing me into an electric car or truck! Your excuse for this is absurd! You spout environment but cant seem to see that your miracle cars dont run on Unicorn kisses and pixie dust.

They run on Lithium, you scream green energy but have never seen a lithium mine or the amount of fossil fuel it takes to mine it.

Your whole Green energy and protect the environment is a scam!

If you want to drive these green turds have at it! But you have no right to tell me how to live or what to drive since you are an unelected bureaucrat!
