Comments:

While I agree that Delaware Residents should have the right and opportunity to purchase elects vehicles, if they CHOOSE to do so. I do not agree that this should be FORCED on the whole state. There are many families in Western Sussex County who struggle to purchase a vehicle as it is. The greater majority of Western Sussex County doesn't have stable internet, let alone internet at all, than to propose constituents to integrate a charging station in their home. We have a plethora of gas stations. Yet still, on days there are monumental lines. How would our infrastructure be able to support such a drastic change?! We truly cannot! I hope it will be considered that this is not created into the bill. I wish to convey that I am whole heartedly against mandating electric vehicles.
