Comments:

There should be NO mandate or law restricting the use, ownership, registration, or sale of gas powered vehicles imposed on the people of Delaware until every gas powered vehicle operated by the state, county, and local government is replaced with EV vehicles. This should include any and all POV, construction, DNREC, maintenance, security, police, and first responder vehicles, as well as any personal vehicles owned and/or operated by government, state, and local employees. To impose such a restriction on the people of the state prior to imposing said restrictions on the representatives and employees of the state is unconstitutional and illegal.
