**Subject:** Fw: ELECTRIC VEHICLES

I have included the email that I sent to Governor Carney and Shawn Garvin after my latest comments which start NOW!!

I bet that the two of you and your committee have never thought about the following issue and my guess is that even if one of you thought about it you could give a Damn about it.

Starting with the mandate as of 2035 there is a major issue that will affect any one buying a new car or truck that is mandated to be electric. Now, what about those people who buy a 2035 model and then want to trade up in 2037 or 2038. Their 2035 model is now a used vehicle. Now, the question what person would want to buy a used electric vehicle that has been used and recharged many times. Those very expensive batteries can only be recharged so many times then they become totally useless. They are not recyclable and will go in the trash and damage the environment far worse then all the

gas and diesel vehicles on the road today and anytime before 2035 when the cut over takes place. But If someone is crazy enough to buy a used vehicle that has not had a brand new battery installed they will most likely face a \$10,000.00 or more bill to replace the battery in a short amount of time.

OF course, you high level politicians have not thought about that AND DO NOT CARE. Now if the law or regulation requires that every used vehicle sold that later needs a new battery can force the the politicians that came up with this stupid idiot regulation or law MUST PAY FOR EVERY NEW BATTERY THAT MUST BE INSTALLED SO THE VEHICLE OWNER CAN AGAIN USE THEIR VEHICLE AGAIN WITH NO OUT OF POCKET COSTS. NONE of these costs for the new batteries and installation can or may be paid for from any TAX PAYER MONEY BUT MUST COME OUT OF THE POCKETS OF THE RESPONSIBLE POLITICIANS.

Maybe if these idiot politicians have to deal with the costs for replacement of batteries out of their own pockecks they will put their brains back in their heads and realize how stupid this mandate is.

Finally, I have no issue in giving people a choice of buying an electric vehicle or gas vehicle or diesel vehicle or any other type of powered vehicle is developed in the future but NO MANDATES!!!!!!!!!!!!

I would like to know why in the hell you guys are trying to do as California does? Are both of you so stupid that you do not realize that California is about 3,000 miles west of us and is so screwed up that it may have to be thrown out of the United States because it is turning communist!!  
is it your goal to turn Delaware Communist????

Wise up!!! There is nothing wrong with having some electric vehicles but we need and will need for many years ahead gas and diesel vehicles as well.

Also, have either one of you ever considered the damage to our environment because of electric vehicles??

Just making the batteries is a hazard then when they go dead in a few years they will cost owners over \$10,000 to replace them and there is no safe way to dispose of the dead batteries and they will pollute the earth for hundreds of years to come. Of course you DID NOT BECAUSE DEMOCRATS DO NOT THINK OF OR CARE ABOUT ANY LONG TERM ISSUES BECAUSE OF A STUPID MANDATE...

Also, have you even given thought much less evaluation as to what kind of Super power grid we would need to supply enough electric so that all owners can charge their vehicles every day or two?? What about the huge cost to all citizens to build the needed supply grid so that everyone can also keep their appliances, heat pumps and water pumps working

100percent of the time. OF COURSE THE TRUE ANSWER TO THAT IS NO, IT HELL NO!!!

John, you were elected twice to service the people of this state in a safe and sensible which you actually did in your first term but I guess kissing Communist Joe Bidens ass is a much better option then serving the citizens.

As for you Shawn, I have never met you but I have talked with several people who have met and talked with or at least tried to talk with you. They say that you do not even listen to them.... I guess that is because you are appointed and can give a damn less for the citizens of Delaware but I understand you are very good friends with our communist President who is working very hard and having help wit you and may others to destroy the entire UNITED STATES OF AMERICA!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

If your goal is to destroy something, please move to China and destroy their communist party!!

Yes, you can easily tell that I as well as many others are totally pissed off at both of you for your idiot thinking!!!
