Comments:

I oppose this mandate. Cars are expensive. New cars are even more expensive. And now you think you can MANDATE that I drive an electric car? You're wrong. Not even Elon Musk mandates it and he has the most to gain from it. We the people do not want this heinously expensive, ridiculous mandate that forces us to drive cars that can be shut down electronically by our enemies, and run out of electricity somewhere there is NO plug to charge back up. It takes me a couple minutes to fill my car w fuel; I'm not planning on wasting hours charging up my car. Not paying for an expensive electric vehicle, not paying to install a charger at my home, and not paying for what will be massive hikes in electric charges once everyone in the country is using WAY MORE electricity than ever before. I think you all forget that electricity still relies on fossil fuels to be created. MY MONEY, MY DECISIONS. End this mandate or face the wrath of the people. The state will decline into failure and cease to exist on the backs of the seriously mislead leftist mafia. Those of us who have money will move out of the state and take our tax dollars and expenditures with us. Your state economy will crumble. Trust me, liberals can't afford electric cars. So good luck! You will lose everything this state is now.
