Comments:

I implore you not to usurp our liberty with any mandates whatsoever. especially around the type of vehicle we can buy. let the free market establish consumer choice. It is outrageous that you would think you are entitled to take away our freedom of choice. The Environmental is not in a particularly bad place. There is no need to mandate EV vehicles. The vehicles are dangerous. I just saw a video of a bus that caught fire. the Technology is not ready. the infrastructure is not ready. Not enough electricity available. The environment savings is false economy if we need to mine for minerals and cause more environmental damage. We are only enriching the Chinese and other foreign countries. The negatives far outweigh the questionable benefits.
