I'm 100% against Delaware's push to mandate EV's by 2035. I have no objections to EV but I shouldn't be forced to buy one or subsidize those who choose to buy them (\$10,000 in federal and state rebates are ridiculous and only benefit the wealthy who can spend \$60-\$80K for a new vehicle). We live in Delaware, not in California. Let's quit trying to copy the zealot environmentalist and forge our own way with sound reason and prudence. I urge my elected officials to vote this proposal down.

Respectfully,  
Thomas Mullaney
