Comments:

I think it is absolutely ridiculous to go to 100% electric vehicles. How are the farmers, truckers, etc., anyone who has long haul going to do their jobs. It takes longer to charge the EV's, taking away their time and their family's time. Please tell me where all these batteries going to be dumped? How will this effect the environment? The cost to replace the batteriers can be very expensive. Will the Federal Gov be giving everyone monies to replace them? Your average person will not be able to afford to replace them. Then what happens they don't have a car, they don't go to work, the then have to live off the government that is forcing them to get a EV. Oh wait that is what the Government wants to control everyone!! Is the State of Delaware becoming the next California? You will be seeing a lot of people move out of this State if you are forcing the people!! THIS IS A BAD IDEA!!!! I had a EV and got rid of it!! I do not want to be forced to buy a product I do not like!! That is controlling the people!!! It is time to get control of the Delaware politicians!
