Comments:

Hybrid vehicles provide lower total emissions than electric vehicles. This is just 1 reason to not follow blindly California. The proposed regulation is unconstitutional. Only the standard at the time of passage can be mandated. Otherwise, it's an unconstitutional delegation of legislative authority to another state's unelected bureaucracy.. That makes no sense. Why would any people become subject to people who have no interest in our state, do not consider the impact on our state, seek no input from any of our citizens, and have no accountability to anyone here. That's called tyranny. Taxation without representation isn't better when it's regulation without representation.
