Comments:

I am not in agreement with a MANDATE regarding electric vehicles, or anything else that we residents of Delaware would be required to buy, or prevent us from buying something else. This should NOT be done by mandate. It should be presented to the legislature for our representatives to be able to VOTE for or against it. Also, the current electric grid in this state could not accommodate the proposed volume of electricity needed to handle the recharging of all these vehicles. I am totally against this mandate.
