Comments:

I do not support the EV mandate for several reasons. I strongly oppose mandates and will never agree that the rule of law and our representative government be subverted by the executive orders of a Governor. Also, the subject of climate change has been dominated by misinformation perpetuated by censorship. There must be open debate as to the causes of climate change without fear or punishment. There is overwhelming evidence that climate change is primarily driven by the sun and that the recent Grand Maximum Warming cycle is over and we are now in another Grand Minimum Cycle similar to the Little Ice Age, the Middle Dark Age, and the Greek Dark Age and that the average global temperature is declining with record breaking cold, snow, and ice worldwide.
