Hi Ms. Newman,

I am one of many proud Tesla owners in Delaware that had to travel to Cherry Hill, New Jersey to purchase my electric car. My Tesla Service Center in Wilmington shared that the current DE law prohibits a Tesla dealership in Delaware.

Surely this law is antiquated & only serves the interests of the DE Internal Combustion Engine dealerships in Delaware. Having a Tesla dealership in Delaware is long overdue and would keep the money of Delaware residents in Delaware.

I hope that this issue is within the scope of the Advanced Clean Car II Regulations.

Thank you for your attention to this matter.
