Comments:

Are we building more power plants? (No, we aren't.) We don't produce enough electricity for the current load today. (Wind and solar won't do it no matter how many whales you're willing to kill.) Adding EVs (artificially by mandate) to the electrical load is plain stupid. (Can't say it more gently.) Support for this mandate is evidence that our politicians are not fit to serve. Delegating elected authority to California lawmakers and state bureaucracies is disenfranchising Delaware voters. (I don't vote or pay taxes to CA.) I like my coffee black and my tea in the harbor.
