Comments:

Please do NOT mandate Delawareans to purchase or drive electric vehicles. You will be taking away choices from fellow Delawareans by imposing the proposed mandate. Electric vehicles are very expensive and they won't significantly improve our air quality. There is scant evidence that the infrastructure will be available if the mandate is proposed. And finally a big reason is EVs need batteries made from cobalt and there are horrifying conditions for the people (including children) working in that toxic environment. Please let the voters decide the laws governing them and take this mandate away.
