Comments:

I live in Sussex county, Long neck De. The average person who lives here cannot afford to buy a house, let alone a electric car. Let's face it all the new housing developments are not ment for the locals here to buy , way over priced. They are ment for all the out of state people with the money. Our understructure cannot handle this influx of people , not be able to charge electric cars , again which we can't afford. What is the fee to charge a car ? I'm sure it's not cheap. We the people are not ready for this. And I'm tired of being told what I can and cannot do . My thoughts thank you .
