Comments:

We are opposed to the EV Mandate. You are not authorized to mandate this for the citizens of Delaware. We are not California and if you investigate this matter, California is having many problems regarding this matter. The battery in the electric vehicles have numerous problems from the mining of the minerals to the fires they cause, to the disposal that will pollute our Earth. These are not affordable for the middle class. This is another bill that would crush the middle class in this country. These would limit the mobility and freedom that is the backbone and pledge of the American dream and constitution.
