We are opposed to the electric car mandate. This will do nothing but hurt Delaware car business owners because we can easily travel to surrounding states to buy gas powered vehicles. We are also concerned about the cost, the danger of fires associated with the batteries, and the impact on our ability to respond in emergency situations. Imagine the amount of electric vehicles dying on the side of the road during an emergency evacuation, or the inability or delay in responding to an emergency because the vehicle isn't fully charged. Why not first try this mandate on all state owned vehicles and busses? Thank you! James and Joann Personti
