# NO, to zero emission vehicles in DE.

We are not living in California and should not be subject to their idiotic Clean Air Act standards.

The people of DE deserve the right to be heard.

As a Delawarean, I say **NO** to the proposed ban on the sale of new gas vehicles in Delaware.

Probably 90% of Delawareans cannot afford an electric vehicle. What about the charging stations, there are not enough of them to support every person's EV. Clearly, this was not a well thought out plan. Have you thought about the strain on the electric grid, probably not. Don't force these mandates down our throats to achieve your political agenda.

Sincerely,

Judith A. Murphy
