Comments:

I am a lifelong Delaware resident who is currently renting my home. I do not believe in this mandate. You can not make us buy what you see fit. Just like you couldn't make us get a Covid shot without the data to back it up! Are you gonna make my landlord install a charger in my home? Are you gonna pay the extra cost to insure my home if that happens, what about the cost of car insurance? Lithium is mined by slave labor and how is that green? How is that legitimate? The batteries are unstable, overheat and cause hard to control fires. Our fire companies are not ready and do not have enough volunteers. Delaware is not California! You have no right to force anything on us being free people! Millsboro has no public chargers. The reasons go on and on. Listen to the people! We can't afford it!
