Comments:

I am strongly opposed to this regulation change. The government should not be dictating the type of vehicle I buy. It will be a hardship for everyday folks like me who live paycheck to paycheck not to mention the threat the switch to all electric vehicles will be to our national security. Our electrical grid is nowhere near ready and is threatening blackouts at peak loads as it is and is projected to get worse. Plus the problems with the batteries catching fire, disposal and cost issues. This is a mistake. Let the marketplace move to electric vehicles as the technology catches up.
