Keep Rural Communities In Mind -Oppose Banning Cars in DE

Dear Governor Carney,

I am writing to oppose the ACC II rules that would ban the sale of gas powered cars and trucks in Delaware. While it is important for us to reduce our dependence on foreign oil and promote cleaner transportation, simply banning cars and trucks like the one I use every day will hurt me and other rural Delawareans.

Our energy costs are already going up, and requiring rural Delawareans like me to purchase new electric cars when they don't fit our needs, and then charge all of these electric cars on our grid will make it even harder to live in rural areas.

As the governor of Delaware, I sincerely ask you to consider the needs and concerns of all constituents, including our rural communities. I urge you to oppose the adoption of ACC II and focus on common sense policies that benefit everyone in our state.

Thank you for representing me,

Respectfully,  
Michael Greenstreet
