Subject: EV Mandate

Thank you in advance for reading my input. After attending one of the forums on the effect of Electric Vehicles on our environment and population, as a small business owner, I have some input. I was unable to find any specific individual or department to forward my concerns to, so I am starting here. As a resident of Kent Country Delaware for over 40 years, the time has long passed to make our voices heard about things that could be detrimental to us in the long run. Hopefully this email will land on ears that will consider this issue and not put it in file 13. The red, white and blue is taking a beating and we the people definitely have something to say about it.

Again, thank you for considering the attached, if this isn't your department, please forward to those who can help. If there are further updates, please add me to the list of concerned citizens.
