1st I'm not a fan of EV's the cost are extreme, they are fire hazards, and to make the batteries is more harmful to our environment and our safety!! Just look at what Russia and China are doing! attacking other countries for these precious elements. As a retiree this will be devastating for my income because of the costs of EV's and also the lower income individuals that we depend on will not be able to afford them either! These individuals are barely making it as it is. It will put more stress on our work force that people depend on, such as store, restaurant and service workers that keep our state whole. These individuals are among the low income makers and more than likely will have to leave our state to afford a living elsewhere! Who will do the work of these individuals? I certainly hope that our Governor will take a closer look at the consequences of implementing this ridiculous Bill. He may afford one but others can not! Pray 🙏 for Delaware and America 🇺🇸
