Comments on 2022-R-A-0011: Low Emission Vehicle Program

Name: John W. Reimer

Phone: (302)684-3007

Email Address: neviousreimer@aol.com

Organization: NO

Comments:

To whom it may concern, I am responding to the Electric Vehicle Mandate. I do believe that the person or persons involved have thoroughly thought or investigated the situation. I believe that the materials needed for EV,s are rare materials that this country will have to rely on imports! They are very costly and will take dangerous mining. This is going to make very costly vehicles, which will put a lot of people out of the market. Also, our electric grid is not ready for this increased usage, which is going to increase the costs! Plus our electric grid is vulnerable! I believe the best for the future is HYDROGEN! If you listen to any of the science programs, they are excited to have found water on the Moon and Mars. Not only because of survival, water makes rocket fuel! 70% of the Earth is covered with water. This will be a cheaper way to go, and it is readily available! And, Hydrogen is clean burning! It makes WATER! Sincerely, John W. Reimer
