Comments:

We would like to register our opinion against going ahead with electric vehicle mandates. We are realizing now how DNREC is going to obtain infrastructure by stealing electricity from those who have solar panels ! I can't understand why De advertises retirement and now wham people need to spend more money on a new car! De doesn't advertise this information to public and this is unfair. How do you expect to have retirees to finance newer cars and pay for increased electricity bills. I don't believe solar power should be stolen from accounts and given to "societal needs". DNREC should be creating power ie solar farms that state owns Where are these batteries going to be kept when they no longer work. How do we plan to address the chemical fires that occur when these batteries catch fire! The amount of water needed is extensive and now you are using up our water supply. What about the chemicals being released into environment! It seems like DNREC has not addressed all our concerns. We can not approve this proposal
