### Comments:

I am opposed to this legislation for a couple of reasons. First the price of EVs are so much higher than petroleum vehicles. I will not be able to afford an EV now or later. I do not agree if any federal subsidies to purchase EVs. This is manipulation of the people and the market. I also oppose this legislation due to the amount of waste an EV leaves behind. EVs don't last more than 10 years and then we have a huge battery that we can't do anything with. I'm currently driving a 22 year old car and plan to drive it for at least 5 more years. It's all I can afford plus it runs well. My last point is safety. I do not want an EV in my garage for fear of self-combusting and loss of my family and/or house.
