Organization: No

### Comments:

DNREC should not have the authority to unilaterally create this program. Any new "Rules or Laws" must come from the Legislative Branch of Government as per our Constitution. Moreover, this proposal greatly restricts our freedom of choice with respect to what type of vehicle I can own. Further, who is going to provide land and build/fund the thousands of charging stations needed to support this program? And what is the impact on our electrical grid for supporting these charging stations? Public opposition to this regulation is around 70% - DNREC needs to pull this proposal off the table! Thank You
