### Comments:

I am opposed to the Low Emission Vehicle Program, for reasons similar to those you have already seen and heard from other constituents. I am concerned about the cost of electric vehicles, especially for lower and middle class individuals. I am concerned about the insufficient infrastructure available to support charging these vehicles. I do not agree with you taking away Delaware citizens' freedom to choose the type of vehicle best suited for their lifestyles and needs. Lastly, has the state considered how transportation funds will be accrued to maintain our roadways? Less people with gas vehicles means less people paying taxes on fuel, leading to less income for Delaware DOT needs. Delaware is not California. Why are we being forced to accept legislation based on what California enacted? Delaware is not prepared for this.
