Comments:

Dear Sir/Madam, I opposed the EV mandate regulations proposed by DNREC because they are based on flawed assumptions. I refer you to the writings and testimonies of David Legates a well recognized climatologist. Furthermore, there is no cause to mandate any such changes. People gave up their horses and buggies because they chose to do so. Plenty of EV and hybrids are available for our citizenry to make their own choice. And lastly, the EVs do not even solve the so-called problems of combustion engines. It takes combustion engines to secure their component parts; and the list goes on. If Delawareans want EVs they will replace combustion engines. There is no emergency and there is certainly enough debate on the topic to make clear that this decision should not be left to a regulatory agency. Respectfully, Janis Chester, M.D. Dover, DE
