Comments:

This EV Mandate proposal is obviously a farce! The Democratic Socialists pushing this ludicrous proposal obviously do not have a basic understanding of the Infrastructure required to support such a ludicrous proposal! The electric grid is already on the verge of collapse! Those ridiculous Windmills and solar panels will not even begin to provide the necessary power to enable such a mandate! In addition, the average Delaware household can not afford the increased costs involved in establishing charging stations, as well as, the increased cost of the vehicle and of the rare earth batteries and their subsequent replacement and disposal! The state of California is an economic disaster as is its so-called leadership! Newsom is destroying California's economy, as well as, its supply chains by attacking fossil fuel vehicles, especially diesel-powered trucks! Eventually, gasoline-powered cars and trucks will be replaced; however, that will not happen by 2034! These fools pushing this mandate should be thrown out of office! They are as incompetent and as misdirected as Biden and his lying, thieving administration! The United States is in need of realistic solutions to our energy needs. Our first concern should be NATIONAL SECURITY! We must re-establish our worldwide dominance in fossil fuel production. Our environment is already much cleaner than China or India! Any additional efforts, made by the United States, to clean the environment will be obliterated by those two countries alone! World War III is a more likely possibility! I will never own an electric-powered automobile and Delaware's Democrat-Socialists, Biden cultists can go to Hell! They have already destroyed Delaware's economy, as well as, its infrastructure by driving all of the major employers out of the state; witness: GM, Chrysler, DuPont, AstraZeneca, Hercules, and ICI America. The best thing the residents of this state can do is take a lesson from the residents of California and get out before the complete destruction of our once successful and prosperous state!!!
