I oppose this measure for multiple reasons. This has NOT been voted on. A decree this sweeping coming from the unaccountable unelected is reminiscent of the Intolerable Acts. Mandating the sale of only electric vehicles will put an unsustainable strain on the electrical generation and distribution systems in Delaware. Especially since the last generation plant in Sussex County has been closed. This mandate is horribly short sighted and will bring nothing but financial misery to the people of Delaware. Especially those who are living on lifes financial edges. Further, this mandate is terrible for the planet. Slave labor is used to mine the rare earth elements used to make the batteries. The chemicals used to extract and refine those minerals are extremely toxic to the environment they are simply poured into after use. This mandate is designed to hurt the citizens of Delaware, nothing else.
