DNREC,

I'm well aware of the plan of net zero carbon and all EV vehicles. It has been a disaster in California and it will be utter devastation to Delaware.

Delaware has already suffered economically from NAFTA and this agenda will be the final nail in the coffin. This needs to be legislated and put to a vote by the people not to be given to a bureaucratic agency made up of people we did not vote for.

People don't have the means to purchase a vehicle and Delaware doesn't have the grid capacity to handle the enormous increase of electricity. Delaware has also shutdown electric plants so it doesn't produce or sell its electricity anymore.

If you increase taxes to the 20% of the people who pay taxes here, these 20 percenters will leave.

I would like this plan to be debated amongst the people. This is clearly unconstitutional.
