Comments:

I am opposed to the idea of accepting the law as written from California. Our electric grid cannot handle the amount of electricity that would be needed for rural areas. Other than New Castle county there is not enough transport to facilitate this action. I have to travel sometimes many miles to complete normal monthly trips for food for myself, my family and my animals. I also travel sometimes many hundreds of miles for my son's archery tournaments. This weekend alone I will travel almost four hundred miles. I would have to stop and wait for my vehicle to recharge. This would cause a problem as I have animals that need to be cared for in that time frame. Right now the infrastructure is not in place to support moving forward with any vehicle mandate. I also cannot afford a new vehicle to meet these requirements.
