I do not agree with Gov Carney and DNREC that the State of Delaware must be all EV vehicles by 2025. Here is WHY:

1. The govt must be honest with people. This will not "Save the Planet." Mining for the minerals for the batteries would only damage the environment. 2. Electricity still needs to be used to operate the charging stations. These stations use FOSSIL FUELS to make charging feasible. 3. It is MY MONEY and the govt should not be telling what I can and cannot buy with it, unless it an illegal.
