Organization: No

Comments:

This mandate is not a mandate that will be fair to the community and those who can not afford to buy an electric car. If the air quality is within limits a mandate should not be done. There is already a lot of people in the lower community that can not afford a car as it is. I do not want electric installed in my home nor do I feel like when I travel to pull over and delay my trip to wait for my vehicle to charge. This is added costs and time that I do not wish to have mandated on myself or others in our state
