I just wanted to say that I am completely against the state mandating the purchase of EVs over those that utilize fossil fuels. I believe that the vehicle that I purchase is my choice and the government should not be forcing what I chose to purchase. I say this as someone who in my professional career oversaw the purchase of thousands of alternative fueled vehicles (Hybrids, EV and CNG) so I am not against people choosing to purchase EVs and I fully support installing the necessary infrastructure to make them a viable alternative. But the market should be the driving force.
